EDUCATION

University of Edinburgh <i>Bachelor of Engineering in Computer Science</i>	Edinburgh, UK Sept. 2024 – May 2028
Broughton High School <i>Scottish Highers (AAAAA)</i>	Edinburgh, UK Sept. 2021 – May 2024

EXPERIENCE

AI Adoption Student Experience Intern <i>University of Edinburgh</i>	April 2025 – Present Edinburgh, UK
- Collaborate with the AI Adoption Task Force to implement innovative AI solutions for university systems, with focus on enhancing PATH course selection platform. - Spearhead initiatives to integrate AI technologies into student and staff systems, improving user experience and operational efficiency. - Design and prototype AI-driven features that streamline academic processes while gathering user feedback for continuous improvement.	

PROJECTS

LectureMate <i>Co-Founder, React, TypeScript, Python, Firebase</i>	Jan 2025 – Present
- Developed LectureMate, an AI-powered platform that transforms lecture recordings into structured notes, flashcards, and quizzes. Utilized LLMs and LaTeX for accurate, high-quality content generation tailored for student learning needs. - Led full-stack development using React, TypeScript, Tailwind CSS for the frontend and Python, Firebase, and LaTeX for the backend. Implemented real-time data synchronization, content storage, and user authentication through Firebase. - Managed AI content pipeline with Python and Firebase, automating the creation of study materials and reducing manual intervention by 95%. Streamlined content delivery through scalable cloud infrastructure and error-handling mechanisms. - Grew user base to 250+ active students with endorsements from 5+ professors at the University of Edinburgh. Generated 3,000+ downloads of lecture notes within the first month of launch, demonstrating strong product-market fit.	
Personal Portfolio Website <i>HTML, CSS, JavaScript</i>	January 2025
- Designed and developed a responsive portfolio website from scratch using vanilla JavaScript and CSS3 for showcasing projects. - Created a dynamic theme system with smooth transitions between light/dark modes, persisting preferences via localStorage. - Built an intuitive navigation system with hamburger menu for mobile devices, ensuring optimal experience across all screen sizes. - Integrated social media links, downloadable CV functionality, and interactive project cards with hover effects and animations.	
CRM System <i>Python, SQL</i>	February 2024 – May 2024
- Developed a fully functional Customer Relationship Management system simulating a bank's interface for managing 1,000+ accounts. - Implemented CRUD functionality for customer records, including transaction history and balance management using Python. - Utilized MySQL for efficient data storage with optimized queries to ensure faster access to critical customer information. - Designed an intuitive UI allowing seamless system interaction, ensuring user-friendly experience despite complexity of the system. - Ensured data integrity through comprehensive error handling, input validation, and robust security features for sensitive data.	

AWARDS

HackTheBurgh 2025 Winner

March 2025

University of Edinburgh

Edinburgh, UK

- Won first place at HackTheBurgh XI, Scotland's biggest hackathon, competing against 300+ students.
- Developed "On The Right PATH", an innovative solution to simplify course selection for University students.
- Created a modern web application using Next.js, Tailwind CSS, and Python to transform complex course data into an intuitive interface.

SKILLS

Programming Languages: Python, JavaScript/TypeScript, Java, SQL (MySQL), HTML/CSS, Haskell

Frameworks & Libraries: React, Firebase, Tailwind CSS, NumPy, Matplotlib, OpenCV, TkInter, LaTeX

Developer Tools: Git, VS Code, Visual Studio, PyCharm, Cursor, IntelliJ, Firebase Tools

Soft Skills: Project Leadership, Full-stack Development, Cross-functional Collaboration

Spoken Languages: Turkish (Native), English (Advanced)
