EDUCATION

University of Edinburgh

Bachelor of Engineering in Computer Science

Edinburgh, UK

Sept. 2024 – May 2028

Broughton High School

Scottish Highers (AAAAA)

Edinburgh, UK

Sept. 2021 – May 2024

EXPERIENCE

AI Adoption Student Experience Intern

University of Edinburgh

April 2025 – July 2025

Edinburgh, UK

- Hired to implement AI features for PATH course selection platform remake, working with AI Adoption Task Force to enhance student academic planning.
- Developed AI-powered chatbot providing real-time course guidance, reducing manual support workload by 40% and improving response accuracy.
- Built intelligent course clash analysis system detecting scheduling conflicts and suggesting alternatives for 1,000+ students.

PROJECTS

LectureMate | *Co-Founder, React, TypeScript, Python, Firebase*

Jan 2025 – Present

- Developed LectureMate, an AI-powered platform that transforms lecture recordings into structured notes, flashcards, and quizzes. Utilized LLMs and LaTeX for accurate, high-quality content generation tailored for student learning needs.
- Led full-stack development using React, TypeScript, Tailwind CSS for the frontend and Python, Firebase, and LaTeX for the backend. Implemented real-time data synchronization, content storage, and user authentication through Firebase.
- Managed AI content pipeline with Python and Firebase, automating the creation of study materials and reducing manual intervention by 100%. Streamlined content delivery through scalable cloud infrastructure and error-handling mechanisms.
- Grew user base to 350+ active students with endorsements from 5+ professors at the University of Edinburgh. Generated 3,000+ downloads of lecture notes within the first month of launch, demonstrating strong product-market fit.

Social Media Chatbot Service | *TypeScript, Express, Node.js*

August 2025

- Built minimal TypeScript service with Express for Chatwoot Webhook Bot callbacks, integrating Instagram and WhatsApp messaging platforms.
- Implemented LLM-based AI chat system with OpenAI API for Turkish student university accommodation inquiries, featuring context-aware conversations and spelling mistake handling.
- Developed HMAC signature verification, rate limiting, and real-time database integration with Supabase for conversation history tracking.
- Created interactive test interface with performance metrics and deployed using Docker with automatic health checks and webhook security.
- Engineered intelligent campus selection matching system handling Turkish diacritics, partial names, and number-based selections for 50+ universities.

Personal Portfolio Website | *HTML, CSS, JavaScript*

January 2025

- Designed and developed a responsive portfolio website from scratch using vanilla JavaScript and CSS3 for showcasing projects.
- Created a dynamic theme system with smooth transitions between light/dark modes, persisting preferences via localStorage.
- Built an intuitive navigation system with hamburger menu for mobile devices, ensuring optimal experience across all screen sizes.
- Integrated social media links, downloadable CV functionality, and interactive project cards with hover effects and animations.

AWARDS

PTAS Funding Award

June 2025

University of Edinburgh

Edinburgh, UK

- Awarded £2,441 funding for LectureMate project development through the Principal's Teaching Awards Scheme (PTAS).
- Secured competitive university funding to support 7-month implementation across Informatics first and second year courses.
- Enabled platform rollout to 350+ students, demonstrating institutional recognition of educational innovation and impact.

HackTheBurgh 2025 Winner

March 2025

University of Edinburgh

Edinburgh, UK

- Won first place at HackTheBurgh XI, Scotland's biggest hackathon, competing against 300+ students.
- Developed "On The Right PATH", an innovative solution to simplify course selection for University students.
- Created a modern web application using Next.js, Tailwind CSS, and Python to transform complex course data into an intuitive interface.

Vibe Coding Hack — 2nd Place

July 2025

Encode Club

London, UK

- Secured 2nd place competing against 150+ participants, developing an innovative AI-powered meeting intelligence solution.
- Built "Reflectly" with real-time coaching capabilities, automated transcription and summarization, and keyword tracking analytics.
- Implemented performance analytics dashboard to enhance communication effectiveness and productivity for sales meetings.

SKILLS

Programming Languages: Python, JavaScript/TypeScript, Java, SQL, HTML/CSS, Haskell

Frameworks & Libraries: React, Firebase, Tailwind CSS, NumPy, Matplotlib, OpenCV, TkInter, LaTeX

Cloud & Services: Google Cloud Platform, Google Cloud Functions, Firebase

Developer Tools: Git, VS Code, PyCharm, Cursor, IntelliJ IDEA

Soft Skills: Project Leadership, Full-stack Development, Cross-functional Collaboration

Spoken Languages: Turkish (Native), English (Advanced)
